

MCOM 's HOTstream™ solution at HTNG European Conference

Athens, October 2009. Media Communications S.A. (MCOM, www.mcoms.com), member of the international organization Hotel Technology Next Generation (HTNG, www.htng.org), participates and sponsors for one more year the annual European conference. This year's conference is being held at Lisbon having already attracted the interest of the biggest hotel chains.

Media Communications S.A. is the sole Greek company that is member of HTNG, whose aim is the design, development and standardization of new technologies for the hospitality sector through the collaboration of technology vendors and hospitality enterprises.

Having many years of experience in the sector of entertainment and information technologies through IP networks, MCOM's executives participate actively in the work groups, contributing in the design and development of new products and practices that simplify the hotel's technical environment.

During the conference meetings, Media Communications S.A. will inform the participants of the innovative solution that allows hotels without an IP network to offer interactive services through the existing coaxial network. This solution is a combination of the luxury HOTstream platform and CISCO Universal Broadband Routers technology.

About Media Communications SA (MCOM)

Media Communications SA (www.mcoms.com), is one of the leading and highly specialized companies in the Europe, offering innovative services and solutions for creation, management and distribution of audiovisual content through IP networks. MCOM 's product portfolio included **HOTstream**, one of the most advanced and innovative in-room information and entertainment platform for hotels. HOTstream's extensive service list includes Interactive Pay TV services, Video on Demand, Internet, email and instant messenger services on TV, high speed internet on laptop, plus new hotel Interactive TV services. MCOM has also designed and developed **MEDIAstream**, an advanced platform for IPTV, Video on Demand and online movie rental services for telecom operators and internet service providers. The solution can deliver audiovisual content to a range of devices (TVs, PCs, PDAs, mobile phones), through any IP network infrastructure (xDSL, FTTx, cable, satellite, wireless, LAN).
